WOOD FROM DEMOLITION RECYCLING MACHINERY

Isabelle Uyttenhove

12/05/2000

VBS Machinery bvba, a Belgium importer of recycling machinery, selling worldwide, is seeking to represent a sound U.S. company manufacturing machinery that recycles wood from the demolition industry. There is a growing market in Western Europe and in Belgium for this type of equipment. Belgium, although small, is a highly populated country with an active construction/demolition industry. Coupled with increasing environmental and recycling awareness and fulfillment of EU waste recycling goals, industry is now looking at further processing of waste wood from the demolition industry. Several U.S. companies in this sector are already represented in Benelux (Belgium-Netherlands-Luxembourg) or in Germany. VBS Machinery wishes to gain market share in this sector by representing a sound U.S. company in this field that is not yet represented in Benelux or Germany.

Any interested firms should contact as soon as possible:

VBS Machinery bvba
